Hey All,

Although I have not been able to get out there yet but will.  
I always make it a point to post some kind of stream report.  
Water level, Water Temp, Weather in general  
The stream I fished.

My point is I know many of you are out there fishing and the lack of stream reports leaves something to be desired.

Stream reports is the reason I really enjoy this Site  
and why I continue to contribute info when I can.

I realize that a stream report can give up info u do not wish to share. I do not blame you there at all.

I am not looking to find out special spots or have anyone give stream section information.

I am just looking for section of the STATE.

Water Level, Water Clarity, Water FLOW may be some temps would be nice.

I cannot get out as often as some but when I do I relay on much of the information I get from this site. because it may determine when i do go, where I go , because the info on this site is some of the BEST and most reliable i can get before i go.

Just like CHRISTOPER WALKIN needed more COW BELL!  
I need more STREAM REPORTS!

Steve98

Lately there has not been too much
