prayer, that would explain why i remember seeing a couple of dead 14 inchers floating down the penns in the summer when we used to float down in our innertubes.

nick, that is awesome that you also caught a bow. if it was a bigger one it probably came from the union county sportsmans club as they stock up above weikert. we had 2 bows this year between cherry run and ingleby other than that possible wild one.

does anyone do well with streamers in the penns creek?
