Hello all,

I am new to the sport of fly fishing and new to the forum, so let me start by saying hello and thanking all of you for posting some very good info. I have been checking out the forum for a few weeks now.

I have a few questions: I have been a very dedicated fisherman for more than 10 years. Mainly bass, but I just recently moved back to delaware county and would like to try fly fishing for trout and small mouth. I will be mainly fishing Ridley and chester creek, The brandywine, and Marsh Creek on my float.

1. What is a good "Starter" rod? I know this is a loaded question but I would prefer to start out on something cheap like in the \$100 range for rod and reel.
2. Will I be able to use the same rod on both trout and bass?
3. Are there any good fly shops in or around delaware county? I am in Lansdowne

Thanks and I am sorry if these have been posted before. I serached for the rod question but I didnt find anything and the other questions came to me as I wrote this.

Thanks again

Bob
