Lots of people will tell you that the Cabela's Three Forks 7'6" is a super rod for the money. Can't get a better rod for \$49 bucks and you'll fall in love with using a smaller rod. If you're strictly using it for small creeks, don't be afraid to put a 4wt line on it - will make tight casting even easier.

Guaranteed there will be nay-sayers, but hey, lots of people love them.
