Forgot to post how my friend and I did last Saturday. We arrived at the creek around 11am. Only seen a few small caddis flies here and there. we were in the open water above Weikert and below Cherry Run. It was a rough day for me with just getting over pnemonia. I only fished about 15 minutes with no hits on an October Caddis wet. I forgot to take my wading stick along and I was pretty unsteady wading so I sat onshore watching my buddy fish. he did not catch anything either.

Guess I need to recuperate a lot more yet before I will be ready to fish.
