[New! Kraken Reel Series](#)

The Kraken delivers on all criteria laid out by our guides and pros who get their thrills from pursuing the biggest, fastest fish this sport has to offer. Featuring our first sealed drag system, it is ready to take on whatever situation your freshwater and saltwater situation calls for. With its incredibly lightweight design machined from aerospace grade barstock aluminum, you'll be able to hold the arm fatigue at bay without sacrificing structural integrity. The Kraken is also our first reel to feature a V cut spool to guide your backing on evenly during your most high speed fish battles!

We offer three sizes to cover all ranges of big game fishing, whether you're fishing 9' rods in the tropics, or a 14' Olympic two hander in the Pacific Northwest, there's a reel to fit your needs!
