Dear Board,

While the BOA system seems intriguing it also appears to be drastically over-engineered and rather poorly designed if spare parts are a suggested item in your fishing kit?

It's pretty hard to screw up a doubled "bunny ears" knot, and like others have said in the event of failure broken laces can be readily fixed astream.

I'll pass on the BOA system and anxiously wait to see what will they improve next? 😊

Regards,

Tim Murphy 😊
