Wow, that is nuts. So much for a quiet peaceful time on the water lol.

Last time I was on Cool Spring I didn't see nearly as many as I did when they first stocked it. I did manage 3, but I really had to work for them.

I fished Neshannock for about a half an hour yesterday, but didn't get anything. It was fishable, and I've caught fish in those conditions there before many times in the spring, but still a little high and muddy for my tastes.
