All this talk of laces sent me searching.

I ran across Kevlar Laces. Kevlar sounds like it may hold up to our abuse.

Below is the reply I received when I asked about how waterproof they may be and how they'll hold up to repeated soaking and drying.

"

Thanks, black Kevlar will hold up very good, their only weakness is if the eyelets are rough, they tend to wear a little." This was LAces.pronto.com
