Fished the past weekend. Good numbers of browns and moderate steelhead mixed in. Some good fish around. Moderate flows with color. Canal drainage flows should proceed. Did well with suckered spawn in white and chartreuse. Trout beads are very good choices also. Chartreuse in low lite. Lite pinks and creams. Estaz eggs also. Streamers work well also. Pressure was heavy both days though. Dollingers is a good choice. There are two locations. Perfer the one located by the office.
