Another tip I should offer, is that you generally find out pretty quickly if fish will be taking buggers or not. If you don't have any follows or takes from likely spots then I would switch patterns. On the other hand, if you get strikes or follows right away, dial in the right color and size bugger and fish it until you run out of buggers. My best fish of the year all came from large buggers on days when I had strikes and follows within 10 minutes of fishing.
