Interesting. I noticed the stream wasn't on the stocking list for this fall(I didn't check the fingerling list though), but I know in one of the PFBC reports on their site said the stream was stocked(assuming adult fish) the same day as Oil. I haven't fished it this fall yet.

There are wild fish in there though, I've gotten a wild brown and 2 brookies there in the past, and I'm sure the people who know the stream better catch more. If they just quit stocking all together and fix up the stream a little I'm sure that will help the wild fish.

Fwiw I think they also fingerling stocked W. Br. Caldwell.
