I usually don't post here. I fished Spruce on Sunday, 11/25 from 1:00 to 3:45 at the George Harvey section. Only one fishing. Air temp was 35 degrees, cloudy and water temp was 50 or less.

Hooked 5 large rainbows in one run all over 22 inches, two fish I would say over 25 inches. Netted two, lost one due to break off, and two others straighten the hook. Hooked three on a size 22 BWO soft hackle and two others on a size 20 red midge larva. Also netted one river brown over 17 inches. I kinda had a steelhead experience without going to Erie or Ontario.

Interestingly, I caught several small rainbows that looked wild. Either fingerling plants by Beaver or Harpster or there is some natural bow reproduction going on.

Dale
