The biomass used to be published on the Class A streams but they dropped that several years ago. I don't know why. I have a copy of the Class B list which I use, if you ask PFBC for a copy I'm sure they will send it to you.

If we go fishing together I have a 7'6" 4 weight rod if you don't have one yet when we go.

When I first started fishing small streams I used a 9 feet 6 weight, I don't recommend it but it is possible.
