I've done some limited research in early preparation for the same trip. Smoky Mountain National Park falls on the boarder between TN and NC. I've done more research on the NC side of the Park. There is plenty of trout fishing in the National Park. Jackson County NC has a "Fly Fishing Trail" that highlights several trout streams, that is worth a look. Gorges State Park has trout and bass fishing and offers camping too. I hope to hit all three areas when I make the trip.
