URL:

go to class a section on pfb site as jackie-boy said

look at said stream on delorme atlas & find access road

mapquest access road from your driveway

take camera w. you, especially if a friend accompanies so you can get pics of the chest slams and high 5's.

on a serious note: when pulling 6" wild dink in, do not even beach the fish.. simply bring to your feet w. rod, turn barbless fly w.o touching the dink, fish swims away.

Also, highly recommend a small rod, even though I am not cool enough to have mine built by a Paff member
