Quite a few streams on that map that I would love to fish but never have because all the good water is posted. It will be interesting to see how this plays out, but I would agree that the courts need to be consistent. If it's public ground for purposes of royalties, then it's public ground. Any chance the drillers will have a financial incentive to challenge this and clarify the case law? Maybe the landowners will band together as a class action and settle this all in court for us?
