I want to send a special **Thank You!** to Derek, a PAFlyFish.com member for his review of the GPS Fishing Guide posted on iTunes!

I am actively working on updates for this year which will include an enhanced version of the PFBC County Guides plus PFBC Google Earth, and perhaps even the Higbee map, all right at your fingertips on the built in map including roads satellite and USGS topos plus "touch to go" navigation. It's a tall order but that is my vision.

Worth it ??????

Version 1.0 - Nov 25, 2012

I was skeptical of the power and practicality of this app but for someone like me who has very little time to search out all this info it is worth it. With this app you will have all the info you need to find fishing near you in seconds. It would be nice to see usgs gauges integrated and maybe some kind of local weather integrated but you can't have it all and I have other apps for that. Well done. I expressed my reservations about this app on PaFlyFish.com back when it was first released. I am pleasantly surprised, well worth it.
