Does anyone own a Winston GVX rod? I am considering one in an 8'-6" 4wt. and I am looking for any opinions on them.

I have read that it may not be as fast action as they claim, but more of a medium-fast action?

I know at least one poster will tell me to test one out and decide for myself, so I will save you the typing. I am asking for YOUR opinion. I will form my own opinion if I can find one in the area to cast.
