I kinda like a tippet ring. I use a 7 1/2' leader, then tie the tippet ring.

I always use a couple feet of tippet..... I tie a Uni knot which keeps the line straight and perfect. When I use a tandem..... I tie a 6" piece of tippet to the ring and also use a Uni Knot. The fly stays at a perfect 90 degree angle.

I like this method much better than a tag end on a Blood Knot. It doesn't ever seem to get tangled.
