Nice report! I've been too busy with steel and wild trout last weekend and haven't made it to Neshannock recently. Glo bugs usually work well when it's up and muddy as you found out. Nice fish too.

Check it out after they do the "lunker" stocking in the spring. Most of them are about the size of your last fish and plump. Pretty strong too. I've caught and seen trout in the 20in class there(bows and browns), but you need some cool summers to hold them over.
