In Erie, you're probably limited to Elk when its high and off color. Swinging big flies is not very effective when the water has cleared. Try the Grand River in OH or the Catt in NY, that's good swinging water. This is not a method to fish for numbers. It's a searching method for big water.

I couldn't have summed it up any better.

I will say that Elk Cr. was set up nicely this week with the high flow, low visibility (4-6") and hardly a soul fishing it.

It's only a searching method until you find that one particular tailout....
