I didn't think we got enough rain to have that kind of impact on the LL. It caused more wind damage than anything. Floyd and Lee caused some serious flooding on the creek and trout were everywhere back then. I'm a little out of tune with the LL the past few years but there are a lot of sportsman's associations that used to stock it with fish from Queen City and Cedar. They stocked some decent sized fish. The few times I've fished it the past few years, seems like all I've seen are what I call "cookie cutters".
