I'm loving the tippet rings...saves tippet, reduces the amount tippet you have to bring, and saves time. Plus you can tie up some 2 and 3 fly rigs ahead of time and then swap em out as needed with a simple cince knot to the ring...not all the rebuilding with a pretied leader with surgeon's/bloods.

If you're running a longer rig going deeper, in bigger waters/longer drifts, more weight...I'd suggest a mini swivel instead. I learned the hard way that the rings will twist up your tippet/flies
