Any certain patterns work better than others? I was thinking of trying my small brown mouse.

Like a deer hair or rabbit fur mouse? Nah. Waste of time. You need something that'll sink easily. (Top-water action is wishful thinking BTW)

Take a look at intruder style flies. I've had a lot of luck with them in various color combos. Rabbit strip flies work well too. Woolly buggers are not a bad option as well and you've probably already got some.
