A follow up on my previous post.I remember back in the 50's and 60's seeing Sulphur hatches on the LL that looked like a blizzard in reverse.I also remember my father having to clean his car windshield of all the bugs after driving from the covered bridge to cedar crest blvd so that he could see to drive home.The lack of quality fish I believe has to do with lack of food,they have a hard time living on tricos!

Wish we could bring those times back.
