I used to be a dyed in the wool Orvis Super Strong fan till I got hooked on fluorocarbon. I still use Super Strong but not for tippets, just intermediate sections.

Now my favs are:

#1 - Seagur Fluoro

#2 - Varivas Fluoro

#3 - Rio Fluoroflex Plus

#4 - Orvis Mirage Fluoro

They all are VERY strong for their diameter which is the biggest reason I use them because I do fish light tippets a lot.

The price on all leaves a lot to be desired though the Orvis is the best bargain for the \$\$\$.

BTW the worst I ever used was Umpqua Fluorocarbon. I couldn't give it away!
