Fished the Quittie today. I arrived at the Quittie Nature Park at 8:30 AM. Temp was in the mid 30's. I forgot to take a stream temp...sorry. The water was clear and running at a normal flow rate.

I didn't catch any fish until I was just downstream of the wood walking bridge. I caught one sucker in that large pool. Upstream of the bridge I caught a nice brown in the straight stretch and the one rainbow at the next bend. I didn't see many fish at all. Stopped at noon. As I was leaving I was told that it has not been stocked since mid July. Don't know if it's true or not. It was just great to get out fishing again.

All fish were caught on a size 14 Pheasant Tail nymph with no bead.
