Walked the dogs today along the Heritage section and spoke to a fellow who confirmed some fish kill after Sandy. Told me 36 fish were dead in a dried up pool by the rt 78 bridge. Don't know if there were others but I would n't count it out.

Wharfrat, were you fishing in the hatchery?....just kidding. I would n't be surprised if there is poaching at night, the resident CO is never around that section during the day so he probably could care less about it at night.
