If i still lived down there I would gladly take you out. But I'm 4 hours away now and only get down once or twice a year to visit friends and family..

There is a parking area on the joisey side of river just north of the bridge. those low areas are loaded with stripers early mornings feeding, caught a 25 lber there in 2004. smallies like the pa side and main (center) flow. In august-september the zebra caddis hatch and a size 10 muddler "V" waked does wonders on them.
