I have a redington crosswater 8wt saltwater rod- I believe it is 10' could be 9'6" but i am pretty confident it is 10' (I have had it less than a year and as you can tell- i don't use it often (4 times- maybe)- it is a 4 piece rod- and comes with a fabric sleeve.

I was hoping it was worth about \$65 or so - it was a gift so i am not sure of the cost- and the googles doesnt tell me too much-

in any event- i am located just outside of philadelphia- I hope someone can find a use for it. Please feel free to ask any pertinent questions.

Cheers

Craig
