I've had a blog since 09. I started it as a digital fishing log with narrative reports and pictures. I started it for me, as my own record of fishing trips near and far. I've never really publicized it so it does not get much traffic. This is the first time I have made my blog known outside of close friends and family. Posting gets slow when school keeps me from fishing. My blog just reached the point where if I want to keep posting pictures I have to buy additional capacity. I don't know if I want to pay the freight to keep it going. I've thought about starting a new blog and linking to the old one or importing the old posts, or I may even stop blogging. I'm not sure what I want to do. For your reading pleasure [Fishing Adventures](#) I hope you guys enjoy.
