Don't get discouraged if all ya can get your hands on is mustads or eagle claws. They'll get the job done. Just you have to give there hooks alittle TLC & a little more effort on hook set. The 254 eagle claw oshaggnassy is a better hook in my opinion than the mustad 3407.

I've caught plenty of toothies on those two brands of hooks before switching to gamas.

Eagle claw also makes Trokar hooks. There heavy cover worm hook is sharp as hell and a damn good musky hook.
