I recently bought this - along with another book - from an online seller for some winter reading.

It details the authors introduction to our fascinating sport, and his growth as a fly fisherman - while living in the central PA area.

He is quite lucky to be that close to some great fishing.

Some interesting situations and fishing stories are told, and I found myself able to relate to many of them

Even though he is very careful at not revealing many stream names, I think that I know many of the creeks he is talking about - just from my experience fishing in the same area.

He also shares some favorite fly patterns and stream side strategies, that would be very helpful to anyone new to FF

All in all, I found it a pretty enjoyable read.
