Please follow the guidelines in making a fly fishing stream report. Reports are for professionals to share objective information about their recent fly fishing experiences in Pennsylvania.

Things you should try to include: water conditions, weather conditions, stream, date, time, location, hatches, fishing successes, flies used and other pertinent information.

Things that will not work: an unnamed stream or location, only boasting about fish caught, spin and bait fishing reports, any rants, questions, requests for a report, promotions or advertising. Please use the other forums. As always, no bullying or harassment of posters.

A link back to your site is permitted. Professionals should use this as a way to share information with the community not as a way to get free links or as free advertising.

Please understand if you do not follow the guidelines the Moderators without notice may modify or delete your report.
