I am not to sure, but this is another dilemma for me, because of the Po. I love that stream as much as the Lehigh and do not favor all of that fish waste going into it. Wish there was some type of funds that would help the business create the type of treatment they would need to treat the waste. I definitely do not want all of it running into Saw-Po-Lehigh. I know I have heard from others, that they would not be raising a huge amount of trout compared to what it can hold. Does not make me feel any better about the situation.
