I have to agree with the DEP, if the effluent is dirty, it doesn't get pumped into the stream. Haven't we learned anything since the tanneries and coal mines. To me, it doesn't matter what the classification of the stream is, we're supposed to be cleaning them up, not adding to the problem.

Allowing a waiver is another example of socializing the costs of doing business.

Enough.

That's what I think, I could be wrong.
