My father and I went on a fishing trip out of Sanibel Island in the hopes to get some redfish. Our (fantastic) guide was Paul, and although I didn't catch any fish (my bad casting) my dad caught a couple sea trout. He was spin fishing, and I was using the fly rod. It was really windy when we saw the tailing reds, so that's where I had trouble. Anyway, check out the video, I made it with my new GoPro. Let me know what you think. And yes, I know most of you will hate the music. Tip: Go to youtube and watch it in HD. It makes a difference in my opinion.
