1. Come on guys...We have enough polutants running in our watersheds already...why add to it?
2. Does the water flow over the top of the dam or from the bottom side? If it flows from the bottom the water will be cold year around.
3. We can blame the president's of past for invasive species...even Brown Trout. We should not choose between more desirable and least. Invasive species is invasive species and they all change the watershed environment.
4. That's why I suggested it being turned into a museum.
5. That is like recycling our toilet water for drinking purposes. If it is not prestine- would you drink it?
