I finished my 1st year using only a fly rod and had the best time ever. I went after everything with the fly rod...every body of water I could fish. I had the most fun ever.

I always thought that catching largemouth was over in early November, but I can't give up on fishing for them or anything else. My son and I went to a small pond and I took the fly rod along. I caught two bass around noon on Christmas Day. The pond was half iced over, but I fished the open spots.

Six-weight rod and a black leech pattern stripped really slow along the bottom sealed the deal for this one. Despite the cold water temperature, she fought tough and it took me a few minutes to get her in.

I can't make it through the winter without fishing...I hope for a mild one!!
