My pattern is brown or dun hackle fiber tail, dark gray dubbing, Dun hackle with a white post for parachute style and dun hackle and dun hackle tip wings for catskill and grey/brown deerhair fo the Comparadun.

I've experimented with the hackles and tails and found no real difference as long as its dark.

I fish comparaduns and parachutes for the most success.

If Slate Drakes are on, anything grey body at #14 will work. If you get refusals with your catskill tie, just trim the hackle on the bottom and make it into a comparadun.
