I set mine up for more bassin than for steelheading, its a batson 10' 8" 6 wt. with a rio 7wt. nymph line on it so I can throw bass flies. works for steel head too. I fish the tioga and chemung rivers with it in the summer.

did the same for my 11' 3wt. put a rio 4wt. nymph tip on that as well. 40-50' roll cast are a breeze.
