Hey, guys. There's a stream running parallel to route 83 between the Rte 30 exit and, I think, the Queen Street Exit. You can see it from 83S and it can be seen from Memorial Hospital, as well. I think this stream then goes under Mt. Rose Avenue and into the woods. When I was a wee lad, I used to play in this stream. I remember seeing some 'bows' in it right below a small damn. I had a weird dream about it last night. Which begs the question: has anyone every fished this steam?????
