Thats Mill Creek. Its a flashy drainage ditch between Red Lion and York City(springettsberry). It picks up run off from Yoe, Dallastown and Spring Garden Township. While it has a few coldwater springs feeding it it isn't trouty. Gets real warm in summer. It does have some larger minnow species in it though but hardly worth fishing.

It travels drains the steep hills along Springwood road and Camp Betty Washington before the closing blow through the city and along I-83.
