Love it! Keep it coming. I love this app. For a guy who finds himself all over the place and needs to be able to locate all the locals secret spots this is the tool! Seriously, this is the spot burning App! if there was a pile of spots that NOOO-ONE knew about this would be the flamethrower to burn them with! Straight up, spot burning bonfire! EWWW-WEEEE!!!

in all seriousness. good work on the app UFMguy. you took a lot of publicly available shiz and made it easy for lazy people like me to have on their mobile device. I am impressed and it is well worth the price....wish I would have bought it sooner when you were running the PAFlyFish deal but, ce la vie!

good work, looking forward to the update.
