BOOM!

ask and you shall receive! see how thats done folks? it doesn't get any better than that.

I am really glad to see your app developing so nicely. the format is clear and fantastic and the screen layout is easily navigable which makes it über easy to use.

I think I communicated with you about the app that I was trying to get off the ground that would integrate what you have with maps, stream reports and weather. Maybe you can make it happen!

Your app is very good already, with those added features it would be very powerful!

Thanks again and I am really excited about the new upcoming features! keep up the good work.
