Alright, we are going to do it this way. Since I don't know some of you by face, when we get there please approach me IF YOU HAVE A STUDENT ASSIGNED TO YOU. We will then see who doesn't have a fishing partner (as in the students) and they will be assigned one. The remaining people may do as they wish, photos, making lunch, etc.

As for footage or photographs, do you think you guys could send me the raw footage and photographs? I am going to put together a "club video" and will be using a couple different video sources. Please PM me if you are planning on bringing some sort of Videocamera, GoPro, or something along those lines.
