I have never fished the bay side, can it be productive? This year, I would like to make fishing a little more of a priority. Typically its hang out with the family etc. and take a week break from fishing a ton up here, but I had a blast last time with the blues in the surf. 30+ fish was no problem in a couple hours, and a few were in the 18" range and fought great. Hopefully I have a similar experience this year, but I am still up for suggestions. Do you fish out of a kayak in the bay, or wade/shore fish?
