I was at hays creek back in October after the stocking. I didn't get a catch but then again I was brand spanking new to trout. My buddy hit the stream a good couple of times after the stocking and got maybe 3 max. The Tully is a better location if you want to fish browns and rainbows, you will have great success there. As far as what to use, I've actually been having very good success beading, but for flys I've caught trout with san juans, green weenies, and glo bugs
