Fished the FFO section from the "barn" up to the next parking lot. Water was low and clear even with the dam at +3" over the top (thought there would be more water?) Fishing was typical winter action with a few coming to hand on a black small bunny leach dead drifted in the moving water. My Christmas present arrived by mail yesterday and I fished with a bamboo rod for the first time, and I think this will be my favorite rod. It's a 7'3", 3 wt. and is just perfect for Clarks. Here's the first fish caught with the new boo rod.
